ACKNOWLEDGEMENTS

I would like to express my sincere gratitude to my supervisor, Dr. Nguyen Trong Hieu, for his invaluable guidance, continuous support, and encouragement throughout the course of this thesis. His insightful comments and constructive suggestions have greatly contributed to the completion of this work.

I am also grateful for the favorable conditions and support that enabled me to carry out this research.

Although I have made my best efforts, this thesis may still contain shortcomings. I would highly appreciate any comments and suggestions from readers to further improve the quality of this work.

Hanoi, May 2026
